ROBERTO JUNIOR JIMENEZ ABREU

FrontEnd Developer and UX Designer

Website: https://server1567.github.io

I'm a Software Engineering student and long before starting my career I've been self-taught and passionately studying programming, and everything related to web design, so that before finishing my degree I already have my role as a Web and UX Designer (Web/UX Designer), creating my own projects to build my own experience without having belonged to a business team.

EDUCATION

Professional Technical Bachelor in Computing at PONSCA
August 2016 - July 2018

Software Engineering at APEC University
January 2019 - April 2020

Basic Professional English at APEC University - A2 Level English
October 2019 - March 2020

* I've been learning in a recurrent and self-taught way everything I know.

EXPERIENCE

I haven't had the opportunity to belong to a business team, but by my own means I've been developing projects to strengthen my FrontEnd Developer profile. Did you know that this CV is developed in Adobe XD by me?

VideoClub Design
April 2020

VideoClub is a web design project without any BackEnd functionality (design only) made to fulfill the need for a job assigned from APEC University (UNAPEC) to me.
